Abstract (en)  
[origin: WO8504199A1] A covering layer material based on woven or non-woven material comprises on one side a coating based on 70-94% by weight of a pulverulent inorganic material and 6-30% by weight of sicc. abs. of a binder. It is intended to be used in a plant for continuously producing panels provided on either side with surfacing or covering layers and formed from liquid starting components such as rigid polyurethane foam panels and plaster panels.
