Abstract (en)
An aqueous fabric softening composition containing less than 10% cationic softener also includes an alkoxyated fatty acid amide containing less than 5 alkylene oxide groups per molecule, such as tallow ethanolamide or diethanolamide in an amount such as 110%, together with an ionic salt of Li<+>, Ca<+><+>, Mg<+><+> or Al<+><+><+>. The compositions exhibit low viscosities which are stable on storage.
