Abstract (en)

[origin: EP0160242A1] An improved reflector lamp (10) particularly suitable for architectural lighting and having a color rendition substantially as that of incandescent type lamps is disclosed. The reflector lamp (10) has a compact light source (20) comprising a methal halide arc tube. Further disclosed is a lighting system having a plurality of the improved reflector lamps (10) arranged to provide overlapping beam patterns for highlighting the features of the exteriors of a building being illuminated.
