Abstract (en)

This method employs a continuous press, inside which is situated a fixed and adjustable device (1) by means of which microgrooves are made on the planes to be joined together, which are coated with adhesive before self-blocking produced by continuous compression at the outlet of this device. <IMAGE>

Abstract (fr)

L'invention concerne un procédé de fabrication en continu de bois lamellé, celui-ci mettant en oeuvre une presse continue, à l'intérieur de laquelle se trouve un dispositif fixe et réglable (1) par lequel on réalise des micro-sillons sur les plans à assembler, que l'on enduit de colle avant autoserrage obtenu par compression en continu à la sortie de ce dispositif.
