Abstract (en)

[origin: EP0163021A2] 1. Gripper arrangement for the transport of sheets by their front edge through the printing zone of a printing press with several grippers arranged at a distance from one another and with interspaces between the grippers for access by counter grippers on sheet transfer, characterized in that the gripper coverage of the sheet front edge amounts to at least 40 % and the distance of the individual grippers (3, 3') is only slightly different so that on running through the print zone, the difference in the extension of the sheet (1) at the gripper holding points does not exceed 0.3 %.
