Abstract (en)

[origin: WO8502386A1] Tubing formed of flexible plans or sheets, intended to be used as a package for relatively large objects for long duration storage purposes. The tubing (10) has on its outer periphery force application parts (12) in order to give the bent tubing its proper shape enabling to receive the object. The tubing must then be simply closed at its ends by means of releasable and preferably rectilinear clamping elements (11).

Abstract (fr)

Tuyau formé de feuilles ou de plans flexibles, servant d'emballage pour des objets relativement grands en vue d'un stockage de longue durée. Le tuyau (10) possède sur sa périphérie extérieure des parties d'application de force (12) afin de donner au tuyau plié sa forme propre permettant d'accueillir l'objet. Le tuyau doit alors être fermé simplement à ses extrémités au moyen de parties d'accouplement par serrage (11) libérables et de préférence rectilignes.
