Abstract (en)
[origin: EP0163892A2] 1. A fitting (10) for an incandescent lamp, made of insulating material, having a thread (11) disposed therein for the lamp cap, contact springs, leading into the thread region, for the electrical connection, and mounting channels (19, 20) extending essentially in the longitudinal direction of the fitting, for at least two fixing screws (15, 16), the shanks of which emerge at the head of the fitting, characterised in that the mounting channels (19, 20) are disposed at an acute angle (W) to the longitudinal axis (10') of the fitting, in such a way that they are inclined towards the longitudinal axis (10') of the fitting, from the lamp side (18) of the fitting (10) to the head (12).
