Abstract (en)

[origin: US4646919A] A can, particularly a cylindrical can for maintaining aroma comprises a bottom carrying the contents of the can, which bottom is arranged slidably within the can and which bottom is movable by means of pulling means 3, which are attached to a rotatable ring 5 which can be rotated in a plane perpendicular to the direction of movement, wherein the pulling force or tension exerted on the pulling elements 3 by a rotation of the rotatable ring 5 is directionally changed by a means 4 for changing direction into a tension or pulling force in the direction of the movement of the bottom 10.
