Abstract (en)
[origin: EP0146136A2] The coating consists of a lacquer comprising one or a plurality of phototropic substances. The lacquer may have a plurality of layers of which the phototropic coloration may differ. The optical element may further comprise one or a plurality of phototropic substances. Furthermore, the optical element and the coating may have a non phototropic coloration in a manner known per se.

Abstract (fr)
Le revêtement se compose d'une laque comportant une ou plusieurs substances phototropiques. La laque peut présenter plusieurs couches dont la coloration phototropique peut différer. L'élément optique peut en outre comporter une ou plusieurs substances phototropiques. De plus, l'élément optique et le revêtement peuvent posséder une coloration non-phototropique d'une manière connue en soi.
