Abstract (en)
[origin: EP0165404A1] 1. A device (10) for measuring and calculating stitches in knitwear, comprising a preferably square stitch-counting frame (13) having a frame opening (20) dimensioned to a specific measuring unit (56), e.g. a decimeter, for determining the stitch density and/or row density, wherein the opening edge (46) has a linear measuring scale (48), characterized in that the frame is enlarged plate-shaped in a corner area thereof (16) and is designed as knitting calculator having on the plate-shaped enlargement columns of numbers (27, 28, 42, 53) arranged in lines and columns, relating to associated values of stitch quantity, stitch density and knitted length.
