Abstract (en)
[origin: EP0165426A2] 1. Locking device for a rotatably mounted window, a door or the like having on the hinge plate side at least one pair of wedge-shaped locking members consisting of one wedge-shaped locking member (4) on the frame side and on the door side, engaging behind the frame side locking member when the door (1) or the like is closed, a wedge-shaped locking member (5), the wedge-shaped surfaces of the two locking members (4, 5) being disposed opposite each other, characterised in that the reciprocal distance (15) between the wedge-shaped locking members (4, 5) in the locking position is adjustable.
