Abstract (en)
[origin: EP0166036A1] 1. Stopper (1), comprising a cork body (6), having a cylindrical or slightly frustoconical outer shape, in an axial longitudinal recess (8) of which is placed an insert (7) which is itself provided, in its center part, with a longitudinal lodging (11) which is closed towards the end part of the bottle and open towards the exterior at the opposite end, the inner wall of said lodging (11) being provided with a female threading (12) which is constructed with the same pitch as the male part (5) of a corkscrew (3) of known sort, the insert (7) having, at its closed end, a widened flange (10) which partly covers the corresponding end of the cork body (6), characterized in that a cork cap (15) is inserted over the flange (10) so as to cover it while contacting the end part of the cork body which overlaps the flange.
