Abstract (en)
[origin: EP0166211A2] 1. Piece of furniture with a refuse pull-out, in which there is provided in the furniture body (1) a drawer (3) which has a retaining part (8) for the aperture edge of the refuse container and the upper end faces of which in the closed position of the drawer (3) are tightly sealed by means of an encircling rubber seal (10 ; 10a) through an intermediate ceiling (11 ; 21) in the furniture body (1), wherein the sealing parts of drawer aperture edge and intermediate ceiling in the open position of the drawer have a vertical spacing from one another, but in the end phase of the pushing-in movement and in the closed position come under sealing pressure, characterized in that the drawer is a one-piece prismatic box (3) which is supported by its base on a pull-out device (4) and which at least during the initial phase of the opening movement or as the case may be the end phase of the closure movement is guided horizontally.
