Abstract (en)

[origin: EP0167209A2] The system comprises three extruded profiled elements, one (1) of which forms a horizontal member and the other two (2, 3) of which, capable of snapping into each other, form a vertical member, the joining of two horizontal members (1) and of two vertical members (2, 3), cut to the desired dimensions, forming a framework intended to receive one or more panels (13). The element forming the horizontal member (1) has a profile in the form of a U laid on its side and possesses, on the outer face of its branches, extruded grooves (5) for the insertion of panels (13) and, on the inner face, extruded receptacles (6) for joining to the vertical members (2, 3). <IMAGE>
