Abstract (en)

A device for dusting small objects, like medicine boxes, small fancy articles, trinkets which may be placed in a glass show-case, and reaching corners and places which are not easily accessible, consisting in a handle 1 containing a small electric motor 2 fed by the network through a cable 3 and/or incorporated primary or secondary rechargeable electric batteries 4, such as to place a cylindrical element 7 or 7 min into rotation, said element being hollow or solid, rigid or flexible, connected by pressure, screw or jointing to an axis 6 projecting from said motor 2, and thus also determining the rotation of a duster 8, liable at the end thereof with element 7, which duster 8 will take away the dust.
