Abstract (en)

[origin: US4730288A] An exterior element for a wrist watch such as a case or bracelet at least partially formed from a composite material. Such material comprises an organic binder such as an acetal homopolymer and macroscopic particles of mineral substances which arrive flush with at least a portion of the visible surface of the element and cover the major part of said portion.

Abstract (fr)

Elément d'habillement pour montre-bracelet, tel qu'une boîte ou un bracelet, au moins partiellement formé d'un matériau composite. Ce matériau comporte un liant organique tel qu'une résine homopolymère acétal et des particules macroscopiques de substances minérales qui affleurent sur au moins une portion de la surface visible de l'élément et occupent la majeure partie de cette portion.
