Abstract (en)
[origin: WO8403629A1] An immunogenic composition which comprises: (i) an immunogen containing, an active principle, an antigen; and (ii) an adjuvant which comprises a monomeric adduct formable by adding: (a) at least one monomeric, substituted or unsubstituted, saturated or unsaturated, mono-, di- or poly-acid, neutral or amphoteric active hydrogen atom-containing organic compound to the, or at least one of the, ring double bonds of (b) at least one mono-, di- or poly-unsaturated cyclic (thio)ether.

Abstract (fr)
Composition immunogène comprenant: (i) un immunogène contenant en tant qu'élément actif un antigène; et (ii) un adjuvant contenant un produit d'addition monomère que l'on peut former en ajoutant: (a) au moins un composé organique contenant un atome d'hydrogène actif neutre ou amphotère, monoacide, diacide ou polyacide, saturé ou non saturé, substitué ou non substitué, monomère à la liaison double ou au moins à l'une des liaisons doubles du cycle de (b) au moins un mono-, di- ou poly(thio) éther cyclique non saturé.
