Abstract (en)

[origin: EP0168578A2] 1. Set of wheels for railway vehicles, mounted in wheel carriers, with loose wheels seated on axle journals, coupled to each other via a lever arm mechanism in the manner of guard-rail tie bar steering and horizontally movable in an oscillating manner, characterized in that each loose wheel (1) is assigned bearing casings on both sides, of which the one bearing casing (9) has a vertical swivel axis (15), anchored in the wheel carrier (6), and the other bearing casing (9a) is arranged with horizontal play in the wheel carrier and in that the lever arm mechanism (5) acts on the mutually facing areas of the axle journals (10) which project beyond the bearing casings.
