Abstract (en)
[origin: US4611844A] Tilting harness for receiving and for handling heavy spools or rolls with the help of a rolling frame guided in a crane carriage, and a mandrel arranged on the rolling frame, the mandrel serving to lock in the core bore of the roll with a radially extendable clamping jaw, whereby the drive for the operation of the clamping jaw comprises a spring-stressed tilting lever, which can be tilted by means of a cam against the force of the spring in the retracted position of the clamping jaw.
