Abstract (en)
[origin: EP0168722A1] 1. A distance element for a ceramic hob unit or sink which can be installed in an opening in a work top of a kitchen furniture unit and between the edge of which and the edge of the opening in the work top there is an expansion gap which extends all round an which, after the insertion of the hob unit or sink in the opening in the work top, is filled in by means of an adhesive sealing compound, characterised in tha the distance element (8) is prismatic or parallelepiped in construction and that an added distance piece (13, 14 and 15 respectively) is disposed on each of the parallelepiped faces of the distance element and the individual added distance pieces (13, 14, 15) have diameters differing from one another or are of different thicknesses, and in order to determine the expansion gap (7) extending all round, a plurality of distance elements (8) are distributed round the circumference of the hob unit (1) and are removed again after the definition.
