Abstract (en)

A multi-cylinder stencil duplicator has a coating member (8) defining a nip with one (2) of the cylinders, and has means (38) for applying ink to one side of the nip to form a bead (37) of ink at the nip. A roller (51) immersed in the bead or wedge of ink is preferably driven for rotation in the same direction as the bead and is preferably positioned at the centre of rotation of the bead.
