Abstract (en)
[origin: US4676552A] A chair with four upright legs, each of which has a single socket, has a square frame assembled of four identical sections each having a straight central portion and two end portions bent outwardly through angles of 135 DEG . The end portions of neighboring sections have abutting toothed surfaces, and each pair of such end portions has a tip of reduced cross section which fits into one of the sockets. The seat on the frame is disposed inwardly of the legs to allow for stacking of several chairs in a small area.
