Abstract (en)

[origin: WO8503210A1] Installation enabling to successively adjust, on a screen I, the size of a series of standard images to be fused with the image of a person P to enable said person to observe through a mirror M the mixed images thus obtained. The projector (1) and its mirror M (2) are slidingly mounted on a funicular of which the rails (16 and 17) have a slope equal to the slope of the lowest radius of the projected beam.
