Abstract (en)
[origin: WO8503208A1] Folding chair or deck chair, wherein the backrest, respectively all the deck chair is transferred from a relatively flat position (relaxation position) to an almost vertical chair position, through different more and more straight positions, the folding chair or deck chair being foldable so as to occupy the smallest and flattest possible volume. To this effect there is provided sideways on each rear leg (4) a groove or guide (12) wherein is engaged a tenon (11) provided laterally at the lower end of the upright (6) of the backrest (2). Each of the two guiding grooves (12) is preferably provided with a curvature (18). The lower bearing surfaces (21) of the front legs (3) are conveniently curved backwards/downwards or are configured as curved surfaces.
