Abstract (en)  
[origin: WO8503006A1] A sheath for a syringe needle (14). The sheath (18) includes an enlarged diameter shield affixed to the end of the sheath (18) for protecting a user's fingers from needle (14) insertion. Alternate embodiments include a transferrable shield being initially affixed to the end of a syringe but transferrable to a sheath (18) as the syringe is engaged with a sheathed needle (14).
