Abstract (en)

[origin: EP0170707A1] 1. Method of separating a fleece-like filling material from a fabric covering material, which are, for example, bonded mechanically, chemically, thermochemically or in some other manner and which, for example, are formed as waste in the production of quilts, clothing articles, such as anoraks, thermal suits or the like, characterized in that, in a first operating step, the filling material and the fabric covering material are cut up, in a second operation, the connections between the materials are loosened by tearing or fulling, and in a third operation, the materials are separated by centrifuging.
