Abstract (en)

[origin: EP0171333A1] 1. Disposable plastic container for the packaging of ampoules filled under vacuum, in which the ampoules are arranged vertically side by side, the tips of the ampoules being supported on a square base (1), the container having an encircling member (2) in the vicinity of the middle of the ampoules slightly wider than the base (1) and oblique uprights (3-6) connecting the base (1) to the encircling member (2), characterized in that no two adjacent sides of the container have the same number of uprights, and that the uprights are angular and comprise a first part (9) in the vicinity of the base (1) and a second part (10) in the vicinity of the encircling member (2), the first part being more inclined to the vertical than the second.
