Abstract (en)

[origin: US4712289A] An installation for the automatic grinding of surfaces, especially of body surfaces to be painted of a motor vehicle, in which the grinding aggregate is machine-guided and the grinding disk exchange at the grinding aggregate is realized automatically. For that purpose, the installation provides a grinding disk magazine, a container filled with liquid as well as a support plate. Additionally, the grinding aggregate includes within the area of its grinding wheel a clamping mechanism for the grinding disk which is actuatable hydraulically or pneumatically.
