Abstract (en)

[origin: WO8404115A1] At the making of multi-layer paper it has been a problem to bring about sufficient adhesion between the layers in an efficient and economic way. According to the invention this problem is solved, in that a cellulose pulp with a beating degree exceeding 40<o>SR in an amount of at maximum 10 g/m<2> is inserted between the layers.

Abstract (fr)

Dans la fabrication de papier multicouche l'obtention d'une adhésion suffisante entre les couches de manière efficace et économique a souvent posé des problèmes. Selon l'invention ces problèmes sont résolus en insérant entre les couches une pulpe de cellulose possédant un degré de battage dépassant 40oSR en une quantité de 10g/m2 au maximum.
