Abstract (en)
[origin: US4586352A] Rectilinear knitting machine comprising a frame consisting of two shaped bearing sections, preferably made of bent and soldered sheet steel, extending underneath the needle beds and equipped with vertical standards distributed along the shaped sections and supporting the needle beds with adjustable supports. This constructions enables the length of the needle beds to be increased, while guaranteeing their linearity. In addition, the space between the needle beds is freed for accommodation of rollers and a drawing device.
