Abstract (en)
[origin: EP0172989A2] 1. Stand for displaying merchandise or the like, having display panels (1) and, extending therefrom in cantilevered manner, stand frames (3), which are connected to each other in the region of their lateral edges and the broad surfaces of which are mutually at right angles, characterized in that the connection is achieved by means of fork-shaped push-on bridges (B), each of which has a top fork member (5) and two fork prongs (4), the top fork members (5) of which are bent off at right-angles in their middle and the fork prongs (4) of which, unround in cross-section, engage positively in shoes (sch) which are arranged on the one hand on the broad surface of the display panel (1) and on the other hand on the broad surface of the stand frame (3).
