Abstract (en)
[origin: EP0173236A2] 1. Fitting for windows or doors with a corner section with a flexible band (13) running in a curved track (14) to join a vertical connecting rod (10) with a horizontal connecting rod (10a), the facing ends of each connecting rods (10, 10a) being toothed and connected via an opposed toothed coupling element (23) with one end of the band (13), characterized in that the band (13) is formed of a flexible plastic, that the coupling elements (23) are moulded at each end of the plastic band (13), that a locking pin (17) is moulded in the middle section of the plastic band (13) to engage a catch opening (20) provided in the window or door frame, that the opening (14c) of the C-section of the track (14) points upwards/outwards, and that the track (14) is curved through more than 90 degrees and proceeds to the vertical and horizontal arms (14a, 14b) via swan-neck sections (24, 25).
