Abstract (en)

A support 10 for the resistance element 11 of an exercise device, the resistance element 11 being in the form of a resilient elongated band which passes around said support 10, said support 10 having a body 12 of generally triangular configuration so as to have an apex 21 from which there diverges two support surfaces 22, said support surfaces 22 being covered by a resilient sleeve 14 against which the element 11 bears to facilitate elongation of the element 11 adjacent said support surfaces 22 by resilient deformation of said sleeve 14.
