Abstract (en)

[origin: US4662794A] This invention relates to a facing for the bank of earthen formations, particularly soil masses reinforced by geotextile sheets, said facing being composed of plates individually hooked to the bank by supple hooking elements, and the plates are disposed in substantially horizontal rows, the plates of one row partially overlapping the plates of the row immediately therebeneath.

Abstract (fr)

Ce parement est composé de plaques (2) individuellement accrochées au talus, par des éléments (3) d'accrochage souple, et les plaques (2) sont disposées en rangées sensiblement horizontales, les plaques d'une rangée chevauchant partiellement les plaques de la rangée immédiatement inférieure.
