Abstract (en)

[origin: EP0174258A2] 1. Collection device with escapement for public telephones and other prepayment apparatuses suitable for receiving coins, of the type disposed at the lower part of an inclined slide (1) adapted to store the coins and to release them one at a time, said device comprising for this purpose a single member (5) which rocks about an axis (6) orientated parallel to that of the slide and which comprises a transverse part or shutter (5b) forming a retractable stop at the end of the slide and at least two lateral arms (5c, 5d) arranged so as to retain the waiting coins while the lowest coin is released, characterised in that the lateral fingers (5c, 5d) are disposed along the axis of the single member (5) so as to retain waiting coins (D, d) of several different types by pressing at least the coin located immediately after that to be released against one (2) of the walls (2, 3) of said slide, whatever its diameter may be.
