Abstract (en)
[origin: ES8700703A1] A weaving machine including a device for forming a leno edge is provided wherein the machine has reciprocally moving shafts in which at least one warp thread holder is supported by means of a frame and is arranged on a first one of the shafts for guiding at least one warp thread. A thread guiding device is arranged on a second one of the shafts being guided by the machine frame and having a slanted slot with a support catch at one end thereof for guiding the leno yarn.
