Abstract (en)

[origin: EP0175196A2] 1. A structural member consisting of a piece (1) having in general the shape of a right parallelepiped of rectangular section and exhibiting at least one flat-bottomed groove extending all along its bottom face and at least one projecting portion extending along its top face and forming a small tongue corresponding with the said groove, characterized by the fact that it includes an inner channel (2) open at both ends and extending right through the length of the piece in parallel with its top and bottom faces.
