Abstract (en)
[origin: EP0175389A2] A magnetic recording medium in which a silicon nitride film (33) is formed on a magnetic recording layer (32) having an axis of easy magnetization in the direction essentially perpendicular to its own layer surface. The magnetic recording layer (32) is a metallic magnetic film such as a Co-Cr containing alloy. The silicon nitride film (33) is preferably in a state in which the number of nitrogen atoms is less than four thirds of the number of silicon atoms. A lubricant layer (35) such as a layer of fluorocarbon can be formed on the silicon nitride film (33).
