Abstract (en)
[origin: WO8404770A1] A rigid modular construction unit (10) comprising a pair of frameworks in which each framework comprises construction elements (12, 14, 16 and 18) defining a generally planar structure and each construction element of a framework has a corresponding element in the other framework, the frameworks are connected together in face to face relation so that the construction unit (10) defines a volume, and the elements (12, 14, 16, 18) are arranged to be joined to elements of adjacent modular construction units (10) in a structure.
