Abstract (en)
[origin: WO8500529A1] A games stroke practising apparatus comprising a guide rail (14) along which slides an adjustable bearing mount (15) which pivotally supports an arm (20). The arm (20) supports a fixed club guide bar (24) mounted substantially in swing plane (8), a pivot mounting (29) for a shoulder yoke (25) pivotable about axis (28), a head cap locator (21) adjustable along axis (19) and pivotal mounting (22) for a hand guide (23). The shoulder yoke (25), head cap locator (21) and hand guide (23) are interconnected, for example, by pairs of cables (37, 39), for selected relative movement, to coordinate the player's movements in a preselected manner. A leg guide bar (42) is optionally provided.
