Abstract (en)  
[origin: EP0176617A1] 1. An electronic time switch having an electrical connecting device (2, 3) which is arranged directly on the housing (1) of the time switch, in particular consisting of a plug (2) and a socket (3) which is arranged so as to extend coaxially with the plug (2), having an opto-electronic display module (4) which provides a digital display and having a keyboard (11) which consists of a plurality of keys and is used for the input/programming of the switching times and the setting of the clock time, characterised in that the display surface (9) of the display module (4), in particular the display module (4), is mounted so as to be rotatable with respect to the front side (8) of the time switch and/or the connecting device (2, 3), and that the axis of rotation (6, 7) or the axes of rotation (6, 7) is/are arranged to extend horizontally and/or vertically.
