Abstract (en)
[origin: EP0176843A2] For the attachment of plug pins (22, 23) to an electrical installation apparatus (31), an adjusting piece (10) is used having cut-outs (14) into which the plug pins (22, 23) are inserted and in which they are held. The cut-outs in this case have a constriction (15) on the end facing the switching unit (31) and tabs (17, 18) on the opposite end; these two tabs (17, 18) engage in slots (25, 26) in the plug pins (22, 23) and, in conjunction with the constrictions (15) and a border (24) fitted to the plug pins (22, 23), fix the plug pins (22, 23) on the adjusting piece (10). The adjusting piece/plug pins unit is mounted by means of screws (32). <IMAGE>
