Abstract (en)
[origin: EP0176864A1] 1. A decorative body consisting of plate-shaped elements, in particular a lighting fixture consisting of glass plates, of which at least two adjacent elements are held together with the aid of a fastening means, said fastening means comprising a plate-shaped supporting member having on its outer rim an annular flange that has a constant height and engages a partial annular groove formed on the rim of the outside of each element, characterized in that the plate-shaped supporting member (5) is oval and has a main axis extending in the longitudinal direction thereof, this main axis extending perpendicular to the gap formed between adjacent edges of the elements, and in that the fastening means (4) has a pressing member (6) cooperating with the supporting member (5) so that the elements are held together by form closure.
