Abstract (en)

[origin: WO8504336A1] An impact wall for a device for picking up tennis balls comprises a collecting trough arranged at the base thereof and a ramp rising towards the court and fixed to the trough. The oblique stretched fabric (1) forming the impact wall inclined forwards is only secured at the top and at the bottom of a frame and, each vertical side part of the frame is comprised of two beams (4, 5) holding under tension said fabric by means of a spring (10).
