Abstract (en)
[origin: EP0307971A2] A coupling box for connecting the ends of two lines for flowing media, particularly for internal-combustion engine fuel lines, having a collar part (3) which has at least one insertion opening (5), provided with an elastic sealing body (6), for holding a line end, and at least two securing fingers (16), which can be deflected at right angles to the insertion direction (8) and project over the sealing body (6) and whose free ends are in each case provided with projections (26) which act on the outer wall of the sealing body (6), and having an axially movable securing sleeve (19) which, in its operating position, embraces the free ends of the securing fingers (16), essentially without play.
