Abstract (en)

The foldable chair structure comprises a seat frame (1) to the sides whereof front (2) and rear (4) legs are pivotally connected. The extensions (7) of the front legs (2) are journaled to armrests (8), in turn pivoted on a middle portion of the backrest frame (10). The backrest frame (10) is pivotally connected to the extensions (11) of the rear legs. An oscillable plate (30,40) is journaled on a middle portion of the backrest frame (10) and is releasably engageable by contact with the free ends of the rear leg (4) extensions (11) to prevent accidental folding of the chair structure.
