Abstract (en)
[origin: EP0180059A2] In an output printer (fig. 1) for use in word processing or data processing applications, an apparatus for handling a plurality of document types such as continuous forms and cut sheets is provided. In the present invention there is disclosed a user-friendly technique comprising interactive sequences of operator actions and hardware condition detection by the control logic (40) for selecting the document type handling apparatus for a given print session.
