Abstract (en)

1. A kit for platforms, stands or the like for the presentation of goods in particular in sales displays, e.g., at fairs, in department stores or the like, having structurally identical main mouldings (2) consisting of one piece of plastics which have at least upright walls (3) connected together like a ring or frame and are also provided along at least their one boundary edge (5) with a step (6) retracted like a rabbet the outer dimensions (7) of which are matched to the inner dimensions (8) of the other boundary edge, so that a number of main mouldings (2) may be mounted on one another and in doing so be coupled together via their interengaging boundary edges (4 and 5) with auxiliary traylike mouldings (10) which along the circumference have a step (11) retracted like a rabbet the outer dimensions (12) of which are matched to the inner dimensions (8) of the second boundary edge (4) of the main moulding (2) and also to the inner dimensions (13) of their own boundary edge remote from the step (11) so that these auxiliary mouldings (10) may be put like lids on the main mouldings (2) and also coupled to them via the rabbet like step (11), characterized in that the auxiliary mouldings (10) have, moulded into their tray part (14) a portion (16) sunk like a step which is open on at last two sides lying at right angles to one another and the opening (15) into which lying in the tray part (14) may at least very largely be closed off by means of a lid (17), in particular a hinged lid.

Abstract (de)

Zur Warenpräsentation werden Podeste, Sockel oder dergleichen eingesetzt, die aus einem Bausatz (1) gebildet werden können, der gekennzeichnet ist durch baugleiche und einstückig aus Kunststoff bestehende Formkörper (2), die mindestens aufrechte und ring- oder rahnenförmig miteinander verbundene Wände (3) haben sowie wenigstens entlang ihrem einen Begrenzungsrand (5) mit einem falartig eingezogenen Absatz (6) versehen sind, dessen Außenabmessungen (7) auf die Innenabmessungen (8) des anderen Begrenzungsrandes (4) abgestimmt sind. Mehrere dieser Formkörper (2) sind dabei aufeinandersetzbar und über ihre ineinandergreifenden Begrenzungsråder (4) und (5) miteinander kuppelbar.
