Abstract (en)
Container (12), which may be used as a perfume bottle and is preferably spheroidal in shape, opens from the bottom and stopper (22) forms the base of the assembly. To apply perfume (18) a user can pick up the bottle and invert it, then remove the stopper (22) and apply perfume therefrom. In a normal, resting orientation, the spheroid bottle (12) rests on the stopper (22) and the weight of the bottle serves to ensure that it is securely closed.
