Abstract (en)
In a munition, particularly a mortar munition, pre-formed projectiles, such as steel spheres 5, are supported on an explosive-filled shell jacket 1. To increase the penetration power, a plurality of charges 9, 10, forming projectiles on detonation of the explosive 2, are arranged distributed around the circumference and the length on the front part 7 of the shell jacket 1. <IMAGE>

Abstract (de)
Bei einer Munition, insbesondere Mörsermunition, sind an einem sprengstoffgefüllten Geschoßmantel 1 vorgeformte Projektile, wie Stahlkugeln 5, gelagert. Zur Erhöhung der Durchschlagsleistung sind am vorderen Teil 7 des Geschoßmantels 1 mehrere bei der Detonation des Sprengstoffes 2 Projektile bildende Ladungen 9, 10 über den Umfang und die Länge verteilt angeordnet.
